AppleScript ausführen

```
tell application "Finder"
    set mySongs to selection
    set mySongs to (sort mySongs by name)
end tell

set import_direction to button returned of (display dialog "Sollen die Songs in aufsteigender
    oder absteigender Reihenfolge importiert werden?" buttons ["Aufsteigend", "Absteigend",
    "Abbrechen"] default button 2)

if import_direction is equal to "Absteigend" then
    set mySongs to the reverse of mySongs
end if

tell application "iTunes"
    activate
    repeat with i from 1 to number of items in mySongs
        set thisSong to item i of mySongs
        add thisSong as alias to library playlist 1
        delay 0.5
    end repeat
end tell
```
